

C# Activities

AI Vibe Coding with C# | TGS-2023039178 | v7.0

Ten progressive, self-contained console projects. Install .NET 10 SDK. Follow each README and use its evidence checklist. No API keys or AI subscription are required.

- [Activity 01 - From catalogue specification to executable contract](#)
- [Activity 02 - Compile, run and review an AI-generated C# component](#)
- [Activity 03 - Types, operators, input rules and batch control flow](#)
- [Activity 04 - Methods and console MVC for balance enquiries](#)
- [Activity 05 - Catalogue classes, constructors and encapsulated properties](#)
- [Activity 06 - Interfaces, inheritance and polymorphic grade controls](#)
- [Activity 07 - Order states, payment failure and notification guards](#)
- [Activity 08 - JSON contracts, enum parsing, regex and file lifetime](#)
- [Activity 09 - Library methods, XML documentation and specification traceability](#)
- [Activity 10 - Documented stock component and handover evidence](#)
